#### LOCAL MATTERS.

THE AMERICAN CHEAP TRANSPORTATION Association.—The second annual convention of the American Cheap Transportation Association will be held in this city, commencing to-morrow. Two or three hundred delegates, representing a majority of the States and the chief cities of the Union, are

expected to be present. The object of the Association is to secure the transportation of persons and property at cheap, fixed, and, so far as possible, uniform rates between all parts of the Union and adjacent countries."

The call for this convention some time ago, issued by the Executive Committe of the Association, says:

"The rapid progress and development of our country during the past decade has signee in the place of William B. Tabb, debrought the question of cheap transportation prominently to the front, and it is fast becoming the leading issue of the day. The producer, the manufacturer, the merchant, and the consumer, are beginning to realize that steam and electricity have inaugurated a new era in commerce-bave changed our manners and customs of life even-and that whatsoever may be said of the power and influence of any of the products of the soil, it December next why the order directing is evident that it is transportation which is now king. It levies the largest tax upon widdle county should not be set aside, and production, and in this country its revenues greatly exceed those of the Government. How important, then, that our transportation system should be thoroughly under-

stood and equitably adjusted. "The bringing together of trained minds from every section of our great country-of practical men from every department of commerce and agriculture-for the consideration of this great question, cannot but result in good; indeed, the previous conventions which have been held, although considering the question in its preliminary stages, and necessarily in a crude and elementary manner, have inaugurated a work which in its educational features alone is of inestimable value, for as yet the public mind is quite unfamiliar with the subject, and there is need of all the light which can be thrown upon it.

"As it is a subject which particularly interests the producing, commercial, and consuming classes, it is hoped that all organizations representing those interests will be

freely represented." Josiah Quincy, of Boston, Mass., is president of the Association, R. H. Ferguson, of directed by former decree. Troy, N. Y., is secretary, and F. B. Thurber, of New York city, treasurer. Among he vice-presidents are ex-Governor Z. B. Vance, of North Carolina; Winborn Law- and report. ton, of South Carolina; Colonel Charles S. Carrington, of Virginia, and B. M. Kitchen,

of West Virginia. The Convention will be held at Association Hall, and will be called to order at 10

COST OF IMPROVING JAMES RIVER AS COM-PARED WITH THE COST OF IMPROVING EAST RIVER, NEW YORK .- For the information of those who may fear that the money spent in mproving James river is thrown away, or at least, injudiciously spent, we publish the following extract from the last annual reports of Colonel Craighill, concerning operations in James river, and of General Newton, concerning those in East river, New

Colonel Craighill reports ninety-five holes bored, whose aggregate depth amounts to 819 feet. Exploded, 1,164 pounds nitroglycerine. Removed, 2,589 cubic yards of blasted rock. Removed: For each hole, 27.25 cubic yards; for each foot bored, 3.16 cubic yards; for each pound nitro-glycerine, 2.22 cubic yards. Cost of machinery and

expenses for operating the same three years, rather less than \$60,000. General Newton reports 307 holes bored, of an aggregate depth of 2,629 feet. Exploded, 17,127 pounds nitro-glycerine. Removed, 2,805 cubic yards broken rock. Removed: For each hole, 9.14 yards; for each foot bored, 1.06 yards; for each pound nitro-

glycerine, 0.16 yards. Cost of machinery and expenses for operating the same, \$365,-It seems that such operations cost money

everywhere, but when the odds are as much in our favor as above shown, it is a subject of congratulation.

PUBLIC SCHOOL STATISTICS.—The following is a statement of the scholars in the public schools November 27, 1874: White schools .- Madison school, 527; Leigh school, 534; High school, 222; Central school, 530; Bethel school, 241; Bellevue

In cold weather, or after heavy rains, when the stream is swollen and hurried the evils interest was transacted in this court on thence arising may not be great; but during a long dry spell in summer, when the volume of water and the rapidity of its flow are reduced to a minimum, and the decomposition of the foul refuse proceeds with tenfold rapidity, does it require a physician or a philosopher to divine the effect of such conditions upon the constitution of the atmosphere, and

consequently upon the health of the adjacent (and even more remote) portions of the city? I do not propose, however, to enter into an argument on the subject, but merely suggest it to you, who can do it so much more effectively. You will doubtless agree with me that in any plan for the "improvement' of the creek sanitary considerations should be held prominently in view, and that if by engineering skill and a sufficient expenditure of money this stream can be converted from an open into a covered common sewer, such

a consummation is greatly to be desired in PUBLIC HEALTH. To the Editors of the Richmond Dispatch : I am a citizen of Henrico county, living in Fairfield township, very near the shops of the Chesapeake and Ohio Railroad Company. I desire to bring to public notice that there is no access to the city for persons approaching by the Mechanicsville turnpike, except by Eighteenth street or Second street. If we desire to go to the New market, we have | The Late Disaster at Tuscumbia, Ala. first to go to Seventeenth and Broad, and then up to Sixth street, or else by the Poorhouse hill, which is impassable. Why cannot Ninth or Tenth streets be opened to their intersection with Seventeenth? I am informed it can be done at an expense of distress is much greater than we thought \$1,500. It will open the New market to a large class from the country, who desire easy access to it, and will open a fine road to the new Catholic cemetery from the cathedral, thus serving another large class of citizens in the city. "A terrible slaughter of buman lives was pertetrated at the settlement of Indian lickle, Labrador, on the night of the 15th instant, two whole families being the victim: The names of the families are William J. Morrison and his sons (Thomas and Herbert), and Robert Morrison and wife and their sons (William, Charles, and James). It seems that latterly gangs of E-quimaux Indians have been committing roboeries at the huts and stores of those who held large stocks of goods, and that after the capture of several of the Indians they were publicly chastised by whipping. Their revenge showed itself on the night of the 15th, when Mr. Wm. F. Morrison and his two sons were fouly murdered in their rooms, their bodies being covered with dirk wounds, though they had been first wounded with bullets. Mrs. Robert Morrison's throat was cut deeply in several places, and a bullet pierced her brain. William and Charles Morrison were stabbed in the heart and also shot, but James, the youngest, seems to have struggled hard for his life, as his corpse was found on the staircase leading to the door, near the corpse of an Esquimaux whom be had shot. This is the first instance of criminal or troublesome conduct among the Esquimaux in Labrador in the memory of the oldest fishermen.'

#### Cherokee Nation Affairs.

TELEQUAH, CHEROKEE NATION, November 8.-Official investsgation by Mayor Inga'ls of the fight here on the 24th instant shows a lamentable condition of affairs. Over 100 shots were fired. Joseph Murphy, while quietly at work on a building, was shot in he breast, and died soon after. Thomas Hauchett and Thomas Dilk, who were wounded by pistol-shots, will probably re-cover. The three are members of the Naboth members of the guard. The sheriff important aspects of the subject-viz., 100 warriors have come in, and others are
